Date of Issue: 25th February, 2019

Time of Issue: 4:00 PM

Advisory on Rainfall/Snow

A Western Disturbance is likely to impact the Western Himalayan Region starting from 26th February onward.

Under the influence of the system, snowfall is likely over the high altitude areas and passes of Western, Northern and Central Bhutan from 27th February (evening) to 28th February. Moderate to heavy rainfall is very likely over the isolated places of the country. Gusty wind and thunderstorm is also likely over isolated places during this period.

Updates will be issued if there are any significant changes in the forecast.
